### Finishes

**Me tiles** can be easily installed with the traditional gluing technique. The beauty of the metallic finishes gives the possibility to combine **Me tiles** also with the other traditional tiles, such as gres, wood and other metals in order to create rich and personalized floors and covering. The catalogue offers an accurate selection of finishes and the particular iron finished called "Calamina". All the finishes are available in 7 modules in different sizes for a wide range of combinations.

### Sizes

**MEtiles**  
The elegance of genuine metal

**Me tiles** is a collection of tiles for floors and walls in genuine metal. A metal plate covers the whole gres core, giving the tiles high resistance and all the advantages of the metallic surfaces: durability, easy maintenance, resistance to hits and scratches, total hygiene as it is not porous, choice of finishes.
