

PLANIUM
UNIQUE SURFACES

PLANIUM S.r.l. con passione
e conoscenza dà forma alle idee,
a progetti creativi raffinati, eleganti.

Utilizza **innovazioni tecnologiche**
con **esperienza**, per dare vita
a nuove superfici,
nuovi ambienti contemporanei.

Plasma il **metallo**,
modellandolo a misura,
secondo i gusti del cliente.

Pone attenzione ai dettagli,
dando importanza a **qualità**
e **sostenibilità**.

Nascono così i sistemi di pavimentazione
e rivestimento **PLANIUM**:
funzionali nelle pose,
eleganti nelle finiture,
unici in questo prestigioso connubio
100% Made in Italy.

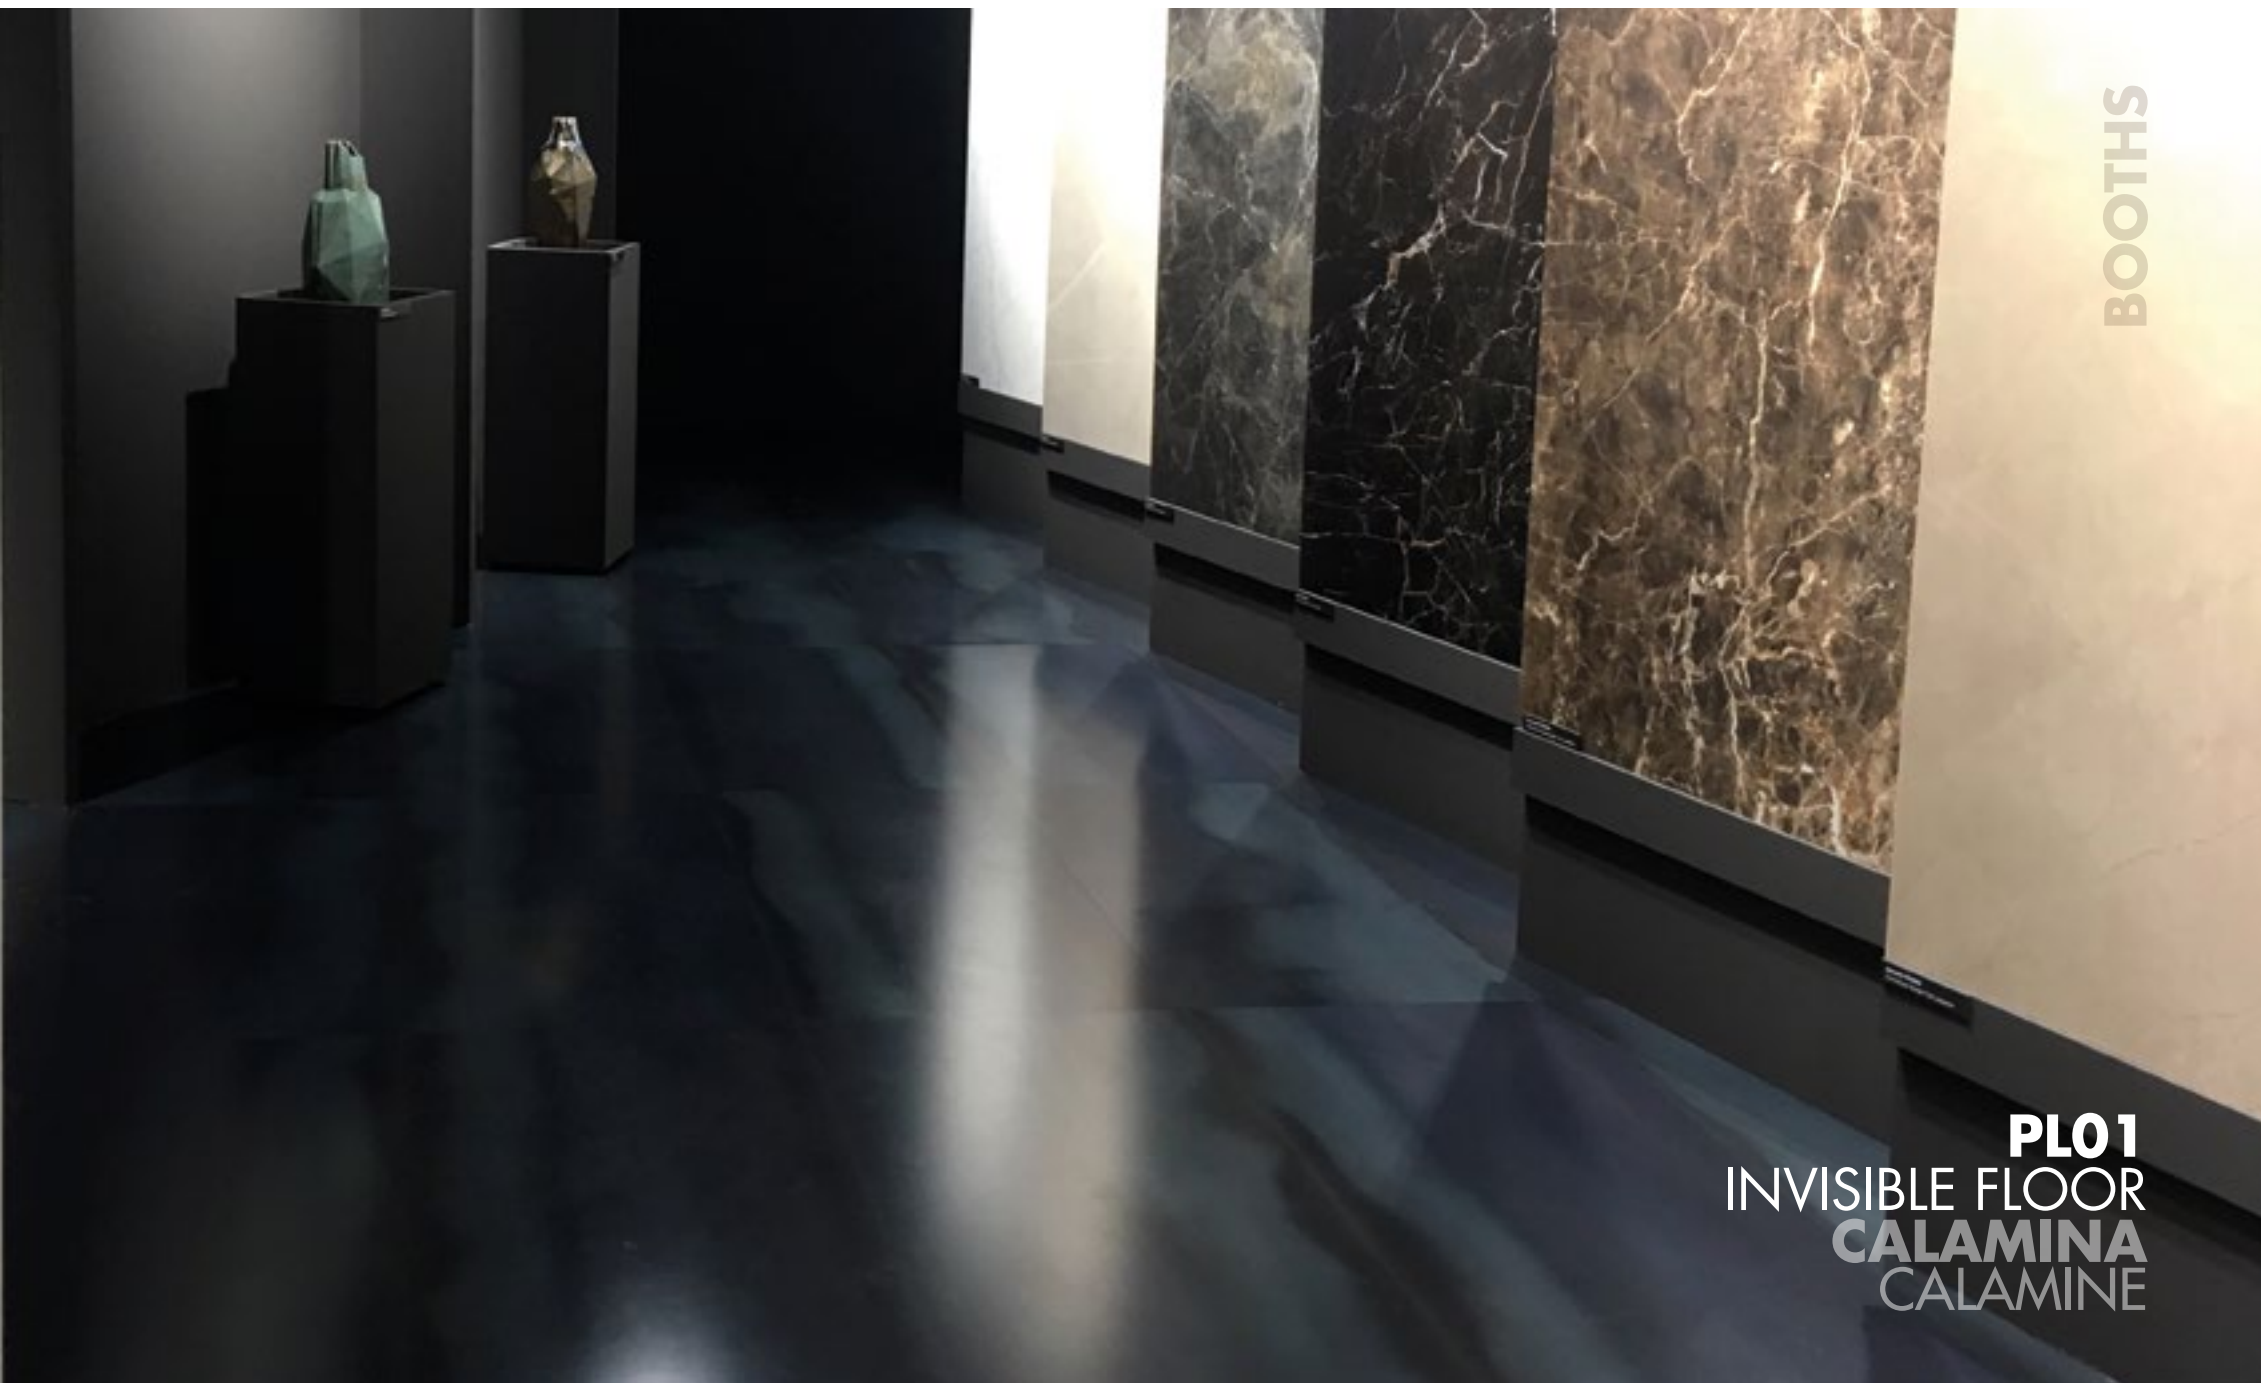

PLANIUM S.r.l., with passion
and knowledge, gives shape to ideas,
to refined, elegant creative projects.

It uses **technological innovation**
with **experience**, to give life
to new surfaces,
new contemporary environments.

It shapes **metal**,
modeling it to size,
according to the client's tastes.

It pays attention to details,
giving importance to **quality**
and **sustainability**.

This is how the **PLANIUM** flooring
and cladding systems were born:
functional in the installations,
elegant in the finishes,
unique in this prestigious union,
100% Made in Italy.

Ricerca e innovazione
uniti a **know-how industriale**
e **tecnologie innovative**
originano le superfici **PLANIUM**, creando
pavimenti e rivestimenti all'**avanguardia**.

Tutti i Sistemi a pavimento o a parete
hanno un **design innovativo**,
funzionale e **rinnovabile**.

Consentono pose **veloci** a **secco**,
nel rispetto dell'**ambiente**,
con semplice **appoggio**
oppure con **agganci meccanici**
o **one-click** tra piastrella e piastrella,
o ancora pose tradizionali a **colla**.

Ogni piastrella è realizzata
con materiali di **qualità**.

Il loro spessore millimetrico
le rende più **leggere** e **maneggevoli**,
anche se scelte di **grandi** dimensioni.

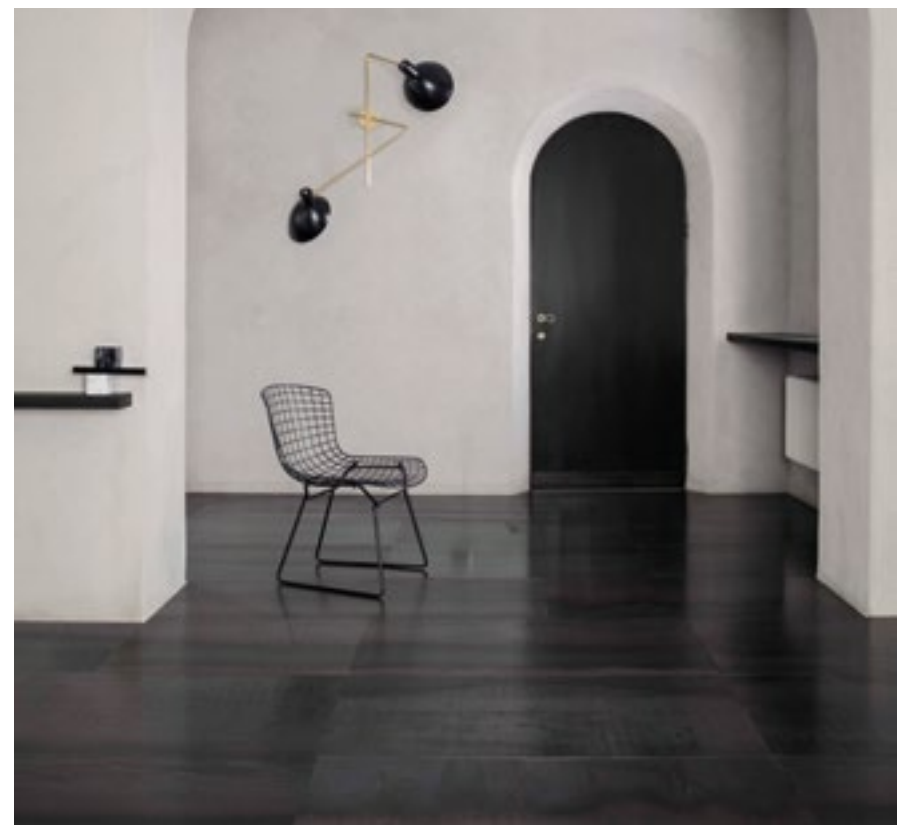

Research and innovation
combined with **industrial know-how**
and **innovative technologies**
originate **PLANIUM** surfaces, creating
avantgarde flooring and wall coverings.

All floor or wall Systems
have an **innovative**,
functional and **renewable design**.

They allow **quick dry installations**,
respecting the **environment**,
with simple **laying**
or with **mechanical**
or **one-click** connections between tile and tile,
or even with traditional **glue** application.

Each tile is made
with **quality** materials.

Their millimeter thickness
makes them **lighter** and **easier to handle**,
even if **large** dimensions are chosen.
